

Dirt Cuts

Use a blunt tool to add wide rivulets into the dirt

Dirt Cuts

Then use a sharper tool to add small rivulets between the bigger ones

Drilled and Blasted Cuts

Drilled and Blasted Cuts

Then drill holes approximately 8' apart. Use a sharp tool like an Awl, insert it into the hole and break it back towards the track causing a blasted effect in the plaster

Color the Plaster

Raw Umber
Burnt Umber
Raw Siena
Burnt Siena
Yellow Oxide
Mars Black
Neutral Gray
Titanium White
Sandstone

Ground Covering

Start with basic earth covering, no vegetation

Ground Covering

Start with basic earth covering, no vegetation

Ground Covering

Ground Covering

Add the fine ground
foam for grass

Ground Covering

Then add a layer of coarse foam for weeds and small bushes

Ground Covering

Then add a layer of
course foam for
weeds and small
bushes

Ground Covering

Top it off with clump foliage for bushes, rocks, twigs and sticks and even some wild flowers

Ground Covering

Ground Covering

The final step is to add trees. Keep in mind trees look more natural in odd numbers
